NOTIFICATIONS.

Government, Order A, 1920.

No. 105.—The following resolution of the Government of India is republished:—

HOME DEPARTMENT.

PASAPORTS.

Dated, the 26th December 1914.

No. 2241—2244.

Sanctionment.—In pursuance of the orders contained in the Resolution of the Government of India in the Home Department, No. 2241-2244, dated the 26th December 1914, the Government of India in Council is pleased to issue the following instructions with regard to certificates of identity.

3. Every native of India who commences proceeding out of India to foreign countries is strongly urged before leaving, to furnish himself with an authentic certificate of identity, in the form appended to this Resolution, signed by the head of the District (in a Presidency Town and in the town of Bangalore, the Commissioner of Police) in the case of residents of British India, and by the District Officer in the case of residents of Native States. In the case of a student the certificate should be signed by the head of his last school or college and countersigned by the District Officer (in a Presidency Town and in the town of Bangalore, the Commissioner of Police) or Public Office in the case of a boy.

Appeals for assistance by destitute Indians who desire registration and by students who, owing to extraordinary circumstances, are unable to complete their course of education must be dealt with sympathetically unless the parties are in a position to produce evidence of identity. The possession of a certificate of identity will be specially useful to young men of good family, as it may enable the Secretary of State to obtain for them useful and other facilities.

Those who are desirous, however, of travelling in countries where a passport will be necessary are advised to furnish themselves with such a document also before leaving India, in the case of, or in addition to, a certificate of identity. It should be remembered that no person is entitled to a passport, as of right, on the ground that he is a British subject, and the preference before authorising a native Indian of a certificate of identity, unless supplemented by documentary evidence of respectability, is not intended to ensure that a passport will be granted.

Form of Certificate of Identity.

1. Place of applicant.
2. Father's name and caste.
3. Residence.
4. Age of applicant.
5. Nationality of applicant.
6. Social or pecuniary status of father (or guardian).
7. Date of probable departure of applicant from India.
8. Object of applicant's visit to England (Europe).

Signature of District Officer (in a Presidency Town, the Commissioner of Police) or District Officer, or head of school or college.

Notes.

* 1. In the case of a British subject by birth or by naturalisation for a subject of the British Empire.

* 2. In the case of a native of India or of a subject of the British Empire, a certificate signed by heads of schools or colleges.

* 3. The certificate of identity is intended to apply to persons in England or elsewhere for a passport to visit a foreign country. It is not intended that any person is entitled to a passport as of right on the sole ground that he is a British subject. The production of a certificate of identity, therefore, will not entitle him to obtain the grant of a passport, unless it is supplemented by documentary evidence of respectability, as defined by a Local Government or a person, whose reliability is not in doubt, certifying that the holder is a "good" person known to be a person.

The Deposits of officers and soldiers of the British Army who die in India, Egypt, or become insane or otherwise incapable of managing their affairs, will be made over on application to the Prefect of the Committee of Adjutants; or to the legal representative of the deceased as defined in section 25, Regimental Rules Act, 1911 (35 and 36 Vic., No. 3).

POST AND TELEGRAPH REMARKS.

Dated, the 23rd September 1920.

By 6435.—In continuation of the Resolution in the Department of Commerce No. 4135, dated 23rd July 1920, the Government of India, agreeing generally with the recommendations of the Postal Registry Committee, are pleased to pass the following orders with regard to the above.

EXAMPLE 1—A in the grade of Rs. 10 has on the 1st December 1929 completed 25 years of service. He is confirmed as paid probationer. He is sitting in the grade of Rs. 10 and is in 120 in applicable. His pay on transfer to the new scale will be Rs. 95.

EXAMPLE 2—B in the grade of Rs. 20 (pay 6 was allowance) is in the 120th year of his service on the 1st December 1929 even by from the date of confirmation as a paid probationer and is to be absorbed in the grade Rs. 25—35—45—55—65—75. Now the 50 per cent. leaving rule applies and B is entitled to the time scale to Rs. (35 + 4) + 4 (95 = 82). But as Rs. 82 is not a wage of the scale his pay should be fixed at the next higher stage, viz., Rs. 85.

EXAMPLE 3—C a graduate was taken into the Department as Rs. 40 and is now in receipt of Rs. 40 plus a new allowance of Rs. 4. He has 25 years' service on the 1st December 1929 and is at a place where the scale Rs. 45—55—65—75—85—95—105 is applicable. The current stage is Rs. 60 in the new time-scale is Rs. 59 and the addition of eighth increments for his previous service entitles him to Rs. 128. But here the 40 per cent. leaving rule applies and C is entitled to Rs. (59 + 4) + 4 (85 = 128), which, however, not being a stage of the proposed scale, his pay should be fixed at the next higher stage, viz., Rs. 130.

(2) The advance to be allowed to the new selection grades will enter those grades in accordance with the ordinary rules of the Civil Service Regulations and the same rule will be followed in respect of Departmental Branch Postmen and Clerks.

(3) Inspectors and Head Clerks in Departmental Branch will be allowed the benefit of an increment for every two years of service, and those in Bureau are entitled for every year of service, calculation as being, as Inspector or Superintendent Head Clerk, or both.

3. **Rate of group effect in the new scale of pay**—The Committee have ascertained that the new scale of pay together with the local allowances proposed in certain districts in the District Councils should be introduced from the 1st December 1929 in view of the fact that payment of pay of the Telegraph Department was introduced from that date, and the Government of India have decided to accept this proposal. From the survey of pay which will become due under this order, the advance of one month's pay mentioned under the order passed by the Government of India in the Department on the 1st May 1929 shall not be deducted. If the advance already drawn amounts to the local service due, if any, the balance shall be recovered from the monthly pay in three equal instalments.

4. **Local and temporary allowances**—All existing temporary allowances will be continued. Existing local allowances will also be continued up to 31st December 1929, after which date they will be withdrawn unless an application has been made to be continued in addition to the proposed rate of pay now mentioned. Postmen and Clerks are being instructed to make an application for continuing their allowances and to submit proposals for the continuation of such as they may require. Any necessary before 31st December 1929, but if for any reason the (postmen) cannot be given in time, the allowances which are already mentioned will have retrospective effect from 1st January 1929. In the case of local allowances (other than those which are given as compensation for deprivation of currency, for example, the Cash money allowance) which have been mentioned in the Bureau scale proposals on pay, the allowance to be continued will be the amount which is actually drawn at the date of issue of these orders and not a percentage on pay.

5. **Wife and personal expenses allowance**—With the introduction of the revised scales of pay shown in the preceding paragraphs, the wife allowance (including those which on the scale of certain officials in Bombay and Karachi were equivalent for local allowances) and grant comparable to the allowance known drawn by the staff will be discontinued with effect from the 1st December 1929. The District General Officer and Telegraphs has been authorized to continue the grant of a personal allowance to any person who may be adversely affected by the revision, so as to prevent him from actual loss of maintenance.

6. **Cost of families**—The total cost of this revision of pay is estimated at approximately Rs. 50 lakhs a year.

should be self-sufficient. It may, therefore, be assumed that there will be no other school like it in India in the near, or probably even distant future. Moreover on account of its unique character with these specialized instruction it should be available for students from all parts of the country. The improvement of the mineral supplies of the country is an important requirement affecting the general advancement of the country as a whole. In view of these considerations the Government of India have decided that the proposed School of Mines should be an Imperial institution.

6. The findings of the School of Mines was discussed by the Indian Industrial Commission in paragraphs 148 to 174 of their report. The Commission came to the conclusion that in view of the great desirability of keeping the mining industry in the closest possible relation with mining education, the school, as recommended by the McPherson Committee, should be established at Calcutta in the provinces of Bihar and Orissa. The Calcutta University Commission have announced in paragraph 26 of Chapter XXIV of their report the many advantages that Calcutta possesses as the site for its advanced school of mining. The Government of India are inclined to think that the Calcutta University Commission did not fully realize the difficulties that are likely to be experienced by the staff of an institution in Calcutta in keeping touch with the industry of the coal-field or with the scattered metalliferous areas of India and Burma.

7. There are obvious advantages in the establishment of a combined school of mines and geology. In a school of mines, geology must necessarily be one of the prominent subjects and can be developed to a full scale for geologists, whilst the geology courses will be read by those who will specialize in mining. All students will necessarily take the general courses in the foundation sciences, including geology, but they will be allowed to specialize finally in either mining or in geology. It is believed that at the outset the number of students in either branch will be limited, and a combined school will be much less expensive than separate schools of mining and geology. The extent and efficiency of the future instruction will be enhanced by the combination.

8. The Government of India, have, therefore, decided to locate the proposed School of Mining and Geology at Dibrugarh. As already stated, the school will be Imperial and consequently the Government of India will be responsible for its maintenance and administration. The school will be open to students from all parts of British India and instruction will be provided for the training of students from Indian States. It is hoped that provincial Governments as well as universities representing industries that will benefit from the teaching of the school will give financial support in the way of scholarships, travelling fellowships and bursaries. The Government of India desire to make full provision for the adequate representation of provincial Governments and universities interested in the mining industry on the governing body of the school.

9. The following paragraphs represent the tentative views of the Government of India with regard to various details suggested with the scope of the proposed school. They will be glad to receive the views thereon of Local Governments and of the governing body which it is constituted.

(a) As already stated, one of the main objects of the school is the mining side will be to supply trained officials for the coal mining industry, but instruction in metalliferous mining should also receive due attention.

(b) In paragraph 22 of their report, the McPherson Committee made recommendations for lower-grade instruction in engineering. The Government of India feel that instruction for engineering students, either in coal or in metalliferous mining, with however the care from provincial Governments. Close contact is, however, desirable between the teachers of the mining classes in the schools and the staff of the Imperial School in order that the former may be able to keep themselves abreast with the latest developments of their profession and to receive advice and information on technical matters.

(c) In their report the McPherson Committee dealt with the instruction of mine surveyors. In Europe mine surveyors constitute an important branch of the mining profession and considerable training as well as technical skill is demanded of them. The Government of India feel that whether a six-months course or recommended in the McPherson Committee's report will be sufficient for the adequate training of mine surveyors. At the same time it is open to question whether the required training can be suitably imparted at an institution devoted mainly to high grade instruction in mining and geology. This is a point on which the Government of India will await the considered opinion of the governing body of the Dibrugarh School as soon as it is constituted.

(d) The Government of India are deeply appreciative of the recommendation made in the report of the Indian Industrial Commission for the establishment of a metallurgical research institute at Calcutta or Dacca. The definite decision has yet been reached, but they are of the opinion that, should an institute be suitably established there, it would have an actively separate aspect and conduct its work free from the School of Mines. Arrangements may then be made, if necessary, for the interchange of facilities between the two institutes for specialized research and advanced teaching.

10. The Indian Industrial Commission mentioned in paragraph 140 of their report the influence that should exist between an institution like the proposed school at Dibrugarh and the Universities. The point was also discussed by the Calcutta University Commission in their report. In view of the fact that expert opinion is much divided as to the question of the utilization of specialized institutions of this type in Universities, especially in Universities whose courses are situated at a distance from the institutions for the purpose of the regulation of the school. The Dibrugarh Institute, apart, however, maintain contact with the higher form of the educational thought, methods and standards. The Government of India, therefore, think it desirable that the Universities of Calcutta and Patna should be represented on the governing body of the Dibrugarh School. They are also of the opinion that, in order that a diploma of the school may carry sufficient value and that its students may be well-trained at high level, it is essential that, for the purposes of both theoretical and practical instruction as well as in the mines, mineral as well as in metallurgical sciences should be emphasized. There should be specific provision for the purpose of the regulation of the school.

11. After careful consideration the Government of India are of the opinion that the governing body of the school should be constituted as follows:—

- (i) Director, Geological Survey of India. (President.)
- (ii) Chief Inspector of Mines.

- (13) Principal of the College (ex officio Secretary).

EXPERIMENTAL RESULTS

FROM THE MATHEMATICAL CHEMISTRY LABORATORY

[illegible]

The Standard Statement and Descriptions are read at 8 a.m., 10 a.m., 4 p.m. and 8 p.m., and the daily notes are obtained by the application of largely automatic, calibrated transducer "pump" observations. The struts of the lameness are twenty-two feet above the level of the sea, and the spacing of the man-gauges is two feet from the ground. The wind, tide and general weather registered on the shore and at sea are available to mariners.

The total quantity of rain collected since last January is 10.95 inches, the average day for the same period has a 4.52 inches.

SUPPLEMENT TO PART II

OF

THE FORT ST. GEORGE GAZETTE.

No. 413

MADRAS, TUESDAY EVENING, OCTOBER 5, 1920.

[Price, 6 pies.]

AUDIT ORDER OF THE MADRAS POSTS AND TELEGRAPHS CO-OPERATIVE SOCIETY FOR 1919-20.

The accounts of the Madras Posts and Telegraphs Co-operative Credit Society as audited by the City and Port Surveyor, Madras, in accordance with (1) Statutes and Orders, (2) Profit and Loss and (3) Assets and Liabilities as approved by the Assistant Registrar are appended to this order.

5. The year under review is the eighth year of the society's working. The number of members rose from 1,322 at the beginning of the year to 1,608 at its end and the paid-up share capital from Rs. 11,000-0-0 to Rs. 15,000-0-0. The borrowings of the society by way of deposits and loans from members, non-members and societies rose from Rs. 48,513-0-0 at the beginning to Rs. 54,446-4-7 at its end.

6. During the year 2,852 loans amounting to Rs. 1,24,847 were disbursed to members against 2,592 loans amounting to Rs. 1,07,838 in the previous year. A sum of Rs. 1,10,574-0-0 was repaid by members in full discharge of 3,041 loans and as pre-payment in other loans. No number of loans outstanding against members on the last day of the year was 1,794 amounting to Rs. 70,948-12-8. Of these 495 loans amounting to Rs. 7,448 were overdue on the last day of the year. This is very heavy. It is observed that the commission granted by the Posts and Telegraphs Department debt is debited the dues of members from the society but was not fully availed of by the society.

7. During the year under review the society introduced bylaws for the issue of Society bonds to its members and the amount of profits, calculated towards Society bond interest under bylaw 25 was Rs. 916. A sum of Rs. 111-0-0 was allotted as establishment and contingent charges towards the society and the balance of Rs. 805-12-8 was shown as the amount as the surplus fund held in the general funds of the society. It is observed that the society has employed a Manager on Rs. 20-10-000 and his entire pay is debited to this account. It is reported that the approval of the managing committee was not obtained for this expenditure. The absence of the society is drawn to the attention of separate minutes and other accounts thereof under bylaw 24 and manner of payment of profits held under bylaw 22 subject to the approval of the Committee.

8. During the year a sum of Rs. 1,500-0-0 (after reserving 25 per cent of the net profits to reserve fund and paying interest in full) was so debited to dividend account for the payment of 5 per cent dividend out of the profits of the previous year. The amount actually required for dividends was not worked out by the society and the balance of Rs. 1,500-12-11 after paying dividends during the year is shown as liability in the dividend account. The society is requested to work out the surplus and carry it to reserve fund in accordance with clause (d) of bylaw No. 20. It is reported that the society does not keep a register showing the outstanding share accounts of members and the dividend due to them at the end of each co-operative year and other entries of disbursements thereto. This should be attended to by the managing committee.

9. The society worked at a net profit of Rs. 2,658-8-11 during the year under review as against Rs. 2,812-8-8 in the previous year. One-fourth of the Rs. 2,658-8-11 should under bylaw 22 be assigned to reserve fund. The society earned Rs. 12-1-8 as interest on its accumulated reserves in the Madras Central Co-operative Bank, Limited. During this amount the society is requested to remit Rs. 542-5-1 to the Madras Central Co-operative Bank, Limited, for being invested therein towards reserve fund. The amount of Rs. 1,177-12-1 due to reserve account of the previous year still pending payment on 29th June 1920 should also be remitted to the same bank if not already remitted. With this addition the total reserve fund of the society is Rs. 2,338-4-1. The society should also remit the surplus of any other account the surplus referred to in paragraph (7) above.
